

MUSSEL FARMING | MAIN - LINE ROPES

ITSASPLUS

Twisted rope manufactured with Itsasplus fibres. This material owns a great stability when wet, low stretching and low water absorption. Besides, we add a treatment to the rope to have a higher UV protection.

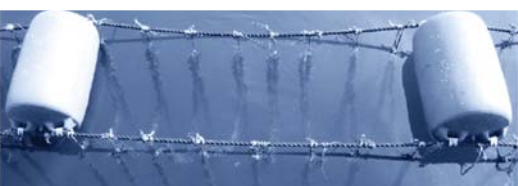

This rope is highly valued for its value for money and its good abrasion resistance.

CHARACTERISTICS

- **Material:** Itsasplus
- **Construction:** 3 or 4 twisted strands
- Buoyancy
- Good UV protection
- Good abrasion resistance
- Low elongation
- Good stability when wet

Diameter	Weight (100m)	Breaking strength
20	20,05	7.600
22	24,50	8.905
24	30,00	10.490
26	34,50	12.320
28	41,50	13.910
30	46,00	16.070
32	53,00	17.540

Diameter	Weight (100m)	Breaking strength
36	68,00	22.080
40	83,00	26.860
44	101,00	31.780
48	119,50	37.180
52	140,50	43.195
56	163,50	49.380
60	186,50	56.680

POLYESTER

Twisted rope manufactured with high tenacity Polyester fibres. This material is specially known because of its great stability in wet, low stretching and low shrinkage. Also, it is a material that does not become rigid when it is used on the water.

For its particular characteristics, this rope owns an excellent UV protection.

CHARACTERISTICS

- **Material:** Polyester (HT)
- **Construction:** 3 or 4 twisted strands
- Without buoyancy
- Excellent abrasion resistance
- Low elongation
- Good flexibility
- Excellent UV protection

Diameter	Weight (100m)	Breaking strength
20	30,50	6.300
22	36,70	7.600
24	43,7	9.100
26	51,20	10.700
28	59,40	12.200
30	68,20	13.700
32	77,80	15.700
34	87,60	17.400
36	98,20	19.400
38	110,0	21.600

Diameter	Weight (100m)	Breaking strength
40	121,50	24.000
42	133,70	25.900
44	146,80	28.400
45	153,80	29.400
48	175,00	33.500
50	189,5	36.200
52	205,00	39.100
55	230,00	43.200
56	238,00	44.800
60	273,00	49.800
