

MUSSEL FARMING | SOCK NETTING

iKotton

Continuous sock netting presented in rolls of 2.000 meters. It is used for growing mussels.

Composed of 100% cotton fibres, the net disappears completely approximately on 15 days. Thanks to its superior quality, the fibre shows a big resistance.

CHARACTERISTICS

- **Material:** 100% cotton fibre
- **Construction:** netting with a 36cm wide entry
- **Packaging:** 2.000 meter rolls (1 pallet has 100 coils of 2.000mt)
- Buoyancy
- Good abrasion resistance
- Good UV protection
- Low elongation
- Good stability when wet
