

GREENHOUSE ASSEMBLY

POLYESTER TWISTED OR BRAIDED ROPE

Rope manufactured with Polyester fibres. This fibre is known for its great UV protection, so it is appropriate for labours with high sun exposure. Also, it is quite an economic rope.

Regarding the braided rope, its neutral lay construction avoids turns while working.

Diameter	Weight (100m)
6	2,70
7	3,75
8	4,80
9	6,20
10	7,60

CHARACTERISTICS

- **Material:** Polyester
- **Construction:** 3 twisted strands or 16 braided strands
- Excellent UV protection
- Good abrasion resistance
- Good flexibility

*Dimensions are only for information purposes.

MIXED iKrome BRAIDED ROPE

Rope manufactured with Polyester fibres, with iKrome fibre core material, that brings low stretching and high tenacity to the rope. The Polyester is known for its great sun resistance, so it is appropriate for labours with high sun exposure.

Diameter	Weight (100m)
6	2,70
7	3,75
8	4,80
9	6,20
10	7,60

CHARACTERISTICS

- **Material:** iKrome (HT)
- **Cover material:** Polyester
- **Construction:** 16 braided strands
- Excellent UV protection
- Good abrasion resistance
- Good flexibility

*Dimensions are only for information purposes.
