

COMBINATION ROPE | GALVANIZED STEEL

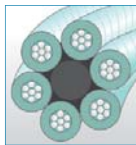

Multifunctional flexible combination rope composed by 6 galvanised steel strands to a strength of 160 kg/mm². The Itsasplus cover provides a tough line with high tenacity and high abrasion resistance. This rope is used in slings, lifting weights, safety harness, lifelines...

CHARACTERISTICS

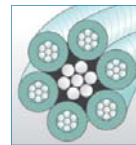

- **Material:** galvanized steel
- **Cover material:** Itsasplus
- **Construction:** 6 strands
- Preformed & postformed
- Excellent abrasion resistance
- Low elongation

*Dimensions are only for information purposes.

6 strands + FIBRE CORE

Diameter	Weight/ MT	Breaking strength
14	0.238	3.600
16	0.265	4.800
18	0.360	5.500
20	0.465	7.200
22	0.475	0.700
24	0.750	11.500
26	0.820	13.300
28	1.068	14.000
30	1.131	17.300
32	1.151	18.500

6 strands + STEEL CORE

Diameter	Weight/ MT	Breaking strength
14	0,31	5.500
16	0,37	6.800
18	0,46	8.000
20	0,63	10.700
22	0,83	13.200
24	1,02	17.800
26	1,20	19.000
28	1,38	23.500
30	1,48	25.500
32	1,61	27.800
36	1,91	30.100
