

PLAYGROUND ROPES | ITSASPLUS OR POLYESTER

Specially designed and manufactured rope for playgrounds. It is a combination rope of 6 galvanized steel strands, that have a resistance of 160 kg/mm². It has a high tenacity and a great resistance to abrasion. That combination of fibre and steel makes this rope highly effecty against vandalism.

Regarding the polyester rope, it has an excellent UV protection, a special softness and availability of colourfull and shiny ropes.

CHARACTERISTICS

- **Core material:** galvanized steel
- **Cover material:** Itsasplus or Polyester
- **Construction:** 6 strands
- **Colours:** blue, green, red, yellow, black and hemp
- Preformed & postformed
- Excellent abrasion resistance
- Low elongation
- Good flexibility
- Softness
- Anti-vandalism

6 strands + FIBRE CORE

Diameter	Weight/ MT	Breaking Strength
16	0,293	4.800
18	0,351	5.500
20	0,460	7.200
22	0,525	10.700

6 strands + STEEL CORE

Diameter	Weight/ MT	Breaking Strength
16	0,478	6.800
18	0,550	8.000
20	0,692	10.700
22	0,816	13.200
