

## COMBINATION ROPE | STAINLESS STEEL AISI 316

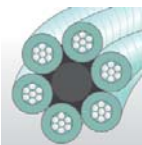

Multifunctional flexible combination rope composed by 6 stainless steel strands to a strength of 160 kg/mm<sup>2</sup>. Due to its Itsasplus cover, we get a rope with great abrasion resistance.

Using stainless steel AISI 316 in its construction, we obtain a rope with an excellent corrosion resistance. This combination rope is ideal for the headropes, higher bridles...

### CHARACTERISTICS

- **Material:** stainless steel AISI 316
- **Cover material:** Itsasplus
- **Construction:** 6 strands
- Preformed & postformed
- Excellent abrasion resistance
- Low elongation
- Excellent corrosion resistance

\*Dimensions are only for information purposes.

### 6 strands + FIBRE CORE

Diameter	Weight/ MT	Breaking strength
14	0.238	3.600
16	0.265	4.800
18	0.360	5.500
20	0.465	7.200
22	0.475	0.700
24	0.750	11.500
26	0.820	13.300
28	1.068	14.000
30	1.131	17.300
32	1.151	18.500

### 6 strands + IWRC

Diameter	Weight/ MT	Breaking strength
14	0,31	5.500
16	0,37	6.800
18	0,46	8.000
20	0,63	10.700
22	0,83	13.200
24	1,02	17.800
26	1,20	19.000
28	1,38	23.500
30	1,48	25.500
32	1,61	27.800
36	1,91	30.100
