

## BRAIDED ROPES | DYNEEMA WITH COVERAGE

Braided rope manufactured with Dyneema fibres and covered with braided Polyester strands. Thank to this special combination, we obtain a rope with neutral lay and high resistance. Also, the braided cover protects the rope from UV exposure and from abrasion.

Diameter	Weight (100m)	Breaking strength
26	33,0	54.000
28	40,3	63.000
30	42,6	68.000
32	50,0	74.000
34	54,0	84.000
36	58,0	93.000
38	70,0	102.000
40	74,0	114.000
42	86,0	127.000
44	89,5	135.000
48	100,8	165.000
52	123,0	195.000
56	146,5	230.000
60	160,6	263.000
64	195,5	308.000
68	212,5	345.000
72	231,5	380.000
76	272,5	429.000
80	288,5	458.000
88	352,0	540.000
96	389,0	626.000
104	453,0	745.000
112	490,0	833.000
120	565,0	955.000

### CHARACTERISTICS

- **Material:** Dyneema
- **Cover material:** braided Polyester
- **Construction:** 12 braided strands
- Excellent abrasion resistance
- Good flexibility
- Excellent UV protection
- Elasticity
- Minimum elongation
- Neutral lay
