

MOORING ROPES

ITSASPLUS

8 strands braided rope with 4x2 construction. It has a good abrasion resistance due to the Itsasplus material. Likewise, its good flexibility, easy handling and buoyancy, makes this rope ideal for mooring.

Diameter (mm)	Diameter (inches)	Weight (100m)	Weight (220m)	Breaking Strength
40	5	79,0	174	28.400
44	5-1/2	97,7	215	33.900
48	6	114,5	252	39.800
52	6-1/2	134,0	295	46.000
56	7	156,0	343	52.800
60	7-1/2	179,0	394	60.500
64	8	203,6	448	68.200
68	8-1/2	230,0	506	77.600
72	9	258,0	567	85.800
80	10	319,0	702	105.600

CHARACTERISTICS

- **Material:** Itsasplus
- **Construction:** 8 braided strands (4x2)
- Buoyancy
- Good flexibility
- Good abrasion resistance
- Low elongation

*Dimensions are only for information purposes.

POLYESTER

8 strands braided rope with 4x2 construction. As it is made with high tenacity Polyester, it has an excellent UV protection. Its great flexibility, easy handling and excellent abrasion resistance makes this rope ideal for mooring.

Diameter (mm)	Diameter (inches)	Weight (100m)	Weight (220m)	Breaking Strength
40	5	121	266,2	32.500
44	5-1/2	147	323,4	38.800
48	6	175	385,0	46.100
52	6-1/2	205	451,0	54.000
56	7	238	523,6	62.800
60	7-1/2	273	600,6	73.200
64	8	311	684,2	83.000
68	8-1/2	351	772,2	93.000
72	9	393	864,6	103.000
80	10	485	1.067	127.000

CHARACTERISTICS

- **Material:** Polyester (HT)
- **Construction:** 8 braided strands (4x2)
- Without buoyancy
- Good flexibility
- Excellent UV protection
- Good abrasion resistance
- Low elongation
