

HEADROPE | PURSE SEINING

ITSASPLUS

Twisted rope manufactured with Itsasplus fibres. This material owns a great stability when wet, low elongation and does not absorb water. This features make this rope ideal for the rigging.

Diameter	Weight (100m)	Breaking strength
16	11,50	4.910
18	15,00	6.305
20	18,00	7.600
22	21,50	8.905
24	26,00	10.490
26	30,00	12.320
28	36,00	13.910
30	40,00	16.070

CHARACTERISTICS

- **Material:** Itsasplus
- **Construction:** 3 or 4 strands
- Buoyancy
- Good abrasion resistance
- Low elongation
- Great stability when wet

*Dimensions are only for information purposes.

TRaKTOR

Braided rope manufactured with high tenacity iKrome fibre, that passes a pre-stretched and thermofixing treatment, earning properties as low elongation and ease to handling.

Its special construction greatly eases the rigging, and this is very appreciated.

Likewise, the treatment gives the rope a great stability when used, avoiding the need of remounting the net.

CHARACTERISTICS

- **Material:** iKrome (HT)
- **Construction:** 12 braided strands
- Buoyancy
- Easy handling
- Good abrasion resistance
- Without corrosion
- Low elongation
- Pre-stretched
- Thermofixing treatment
